

Legacy Audit Summary

This report translates a legacy TCRIA audit payload into a reader-oriented summary. The most visible issue in the reviewed batch is: High-value amendment found without strong approval support in the reviewed batch.

Generated at	2026-04-23T11:25:36
Legacy mode	strict-explicit-decision-record
Legacy basis	TCRIA modular engine audit (prescriptiveGate, complianceGate, traceabilityCheck)
Input path	/sanitized/acme-corp/procurement-batch-q2

Batch snapshot

Metric	Value
Total files scanned	4
Files read	3
Files not read	1
Files blocked	1
Files partially read	2

Main findings

contract-amendment-17.pdf

Legacy status: BLOCKED (complianceGate)

High-value amendment found without strong approval support in the reviewed batch.

- Missing approval support
- High-value contract change
- Traceability expectation not fully satisfied

vendor-boarding-form.pdf

Legacy status: PARTIAL_PASS (traceability warning; static audit)

Vendor file contains a declared review record but only partial due diligence support.

- Supporting approval record present
- Due diligence evidence incomplete
- Traceability signals limited

scanned-exception-request.pdf

Legacy status: UNREADABLE

The file could not be read reliably from the submitted batch.

- Unreadable scan
- Insufficient extraction quality

vendor-checklist-register.csv

Legacy status: PASS

Register contains evidence of required checklist controls for multiple suppliers.

- Supporting evidence markers identified
- Document role suggests supporting proof

Evidence highlights

vendor-boarding-form.pdf

Classification: ACCUSATORY_CANDIDATE

Signal summary: checklist=1

Vendor file contains a declared review record but only partial due diligence support.

vendor-checklist-register.csv

Classification: SUPPORTING_EVIDENCE_RELEVANT

Signal summary: checklist=5, supplier id=8

Register contains evidence of required checklist controls for multiple suppliers.

Limits and translation notes

- 1 file(s) could not be read reliably from the legacy batch.
- 2 file(s) were read with only low or medium extraction quality.
- Some legacy items do not expose gate details in a consistent way.
- This adapted report summarizes a legacy payload and does not re-run the original engine.
